Copy 4 of 4

21 October 1963

Dear Joe:

Enclosed is a set of curves showing the expected threat environment during the sixth through eleventh minute along a track where high signal activity is expected. The number of radars of one class that can be expected to be intercepted are plotted for four values of horizontal intercept range.

In answer to Bobby's question on the timing signal used with the airborne recorder, a [ ] is recorded. The timing signal can be turned on and off by the pilot so a reference will be available by noting the exact time the pilot threw the switch.
